Security Code Entry

You are about to enter a section of the website that can access sensitive data. To proceed, you must perform an extra security validation.

Enter the specified letters from your security word to validate

Please Note: Your security word is NOT the same as your password, and is NOT the four digit code used in PharmaBase.

The security word is a six letter word that you selected from a suggested list when you first logged in to PharmOutcomes

First letter

Sixth letter

You will now be guided through the PGD by following the online questions. Once you have completed the service you click **SAVE** and, that's it, payment will happen **AUTOMATICALLY** at the end of the quarter. Please use the 'EHC over 72 hours' service for clients >72 hrs. This means you will still be paid for the consultation.

Service Support

S Glos EHC for under 25s

If the client is over 72 hours since unprotected sex please use the "EHC over 72 hours" service. Supply of EHC to women under the age of 25 years [p] [p] Remember to carry out Fraser Competency Check for clients that present under the age of 16 years

EHC Options

A copper IUD is the most effective method of emergency contraception and can be fitted up to 120 hours after UPSI at any time in the cycle or up to 5 days after earliest predicted ovulation. The two oral methods are Levonelle and ellaOne. Levonelle can be given up to 72 hours after UPSI (within licence) or up to 120- hours
